LOKI '73
A TIME TO REMEMBER
A TIME TO BE LED
A man who can buy a brick with an odd quarter and build a hall
Whose door is always open like his mind and heart are open
A man who does not know the meaning of the word "quit"
Who will go along with any scheme to help the school
Who meets crises the way a mountain meets sunrise
Who never turned down a boy - or an opportunity
Whose hopes are as bright as his red carpet
Who never dreamed a dream too big
Or met a hopeless situation
Or ever reached too high
Or saw a job too tough
Who never hesitates
Or hurts people
Or is afraid
Or bumbles
A man who must be very tired some nights.
RALPH T. LIVINGSTON, DIRECTOR

DEWAYNE RAKES, DEAN

A TIME TO STUDY
AUTO BODY IS being able to meet the increasing new demands for craftsmen.... it is learning the meaning of plastic fill, fiber glass repair, brazing, and refinishing.... it is alignment and balancing and the setting on his way safely man who prefers to move by spinning wheels.... it is learning about paint and sanding and drying lamps.... it is sharing what you know with a world that needs that knowledge to keep going....

AUTO MECHANICS IS helping to keep man moving on wheels.... it is being necessary... it is seeing a stalled, helpless vehicle and getting a warm happy feeling when you know you can fix it... it is learning about compression and lubrication and rpm's... it is being waked at two a.m. and hearing a voice asking for help... it is feeling the real sense of accomplishment in getting a job done and done right... it is grease and sweat... and it is deep down a good sense of being needed...

DRAFTING IS being a vital part of a culture made up of straight lines and pleasant proportion... it seems to really be transforming ideas into realities... it is a doorway to design and development through doing freehand sketches of ideas, calculating layouts for machinery, and determining design changes as well as estimating production costs... it is putting thought into precise drawings... it is reading blueprints... it is using a slide rule and calculator... it is getting to know a drafting machine and the "feel" of your own equipment... anything is first a drawing before it is made by man... it is a graphic analysis of ideas..... it is being particular, patient, inventive, and self-propelling... it leads to a life of order, adherence, and participation....

ELECTRONICS IS a changing world....... it can be on your wrist as a tiny timepiece, or be a pacemaker for your heart...... it in ads your life as a snoop or as an angel, depending on the guiding hands...... regardless of what you do or where you are, you can never escape its effect on your life... the more you try to understand this phenomenon, the less sure you are of its mysteries.... some of electronics defies explanation... you think you see and you don't see... electrons just doing their own thing.... it demands your respect... it is a real and loyal friend to man, and could well be his worst enemy... it is finding how a radio, television, or other equipment works... it all has to do with chasing the electrons, some of which go one way and some another, and some are blocker to keep from causing interferences... it has a lot of theory... it is an opportunity to go into any of hundreds of jobs... everything from TV repairman to designer of computer circuits for inter-planetary space travel... without electronics, man might still be dancing in moonlight to the beat of a jungle drum... his songs would never be part of the whole world, his tunes would be known only to his own tribe... without a vast complete electronic web linking all the world with the rest of the universe, man would still be groping alone... at least, with the help of electronics, we can grope together....

MACHINE TOOL IS the assurance to modern man that he may continue to exist at his present level of well-being... it is knowing the combinations of machines required to produce that well-being... it is becoming familiar with lathes, grinding machines, drills, cutoff machines, boring mills, shapers, and planers... it is making a layout and assembling the metal parts... it is developing enough judgment to be able to set up and operate any standard machine... it is using a chisel, scraper, or file on parts so they fit together exactly... it is learning to be precise and patient enough to machine a metal part to within 10 millionths of an inch....

COMMUNICATIONS IS the ability to make ourselves understood and to understand others... it is the first thing we learn as a necessity to preserve life... it is the thing we do the most.... to be able to put words together and convey to another mind that thought that begins in our mind.... a defeat for confusion, a weapon for right, and a key to all we might be.... learning the rules of the game and sticking to the rules allows our ideas and dreams to become real.... speeches and book reports and term papers - all building a firm foundation for participation in a most wordy world...
MATH IS a clean science... in a day of confusion and indecision, it is great to know that two and two will always be four... to follow the rules and arrive at the answer is a challenging thing.... to know how to judge the speed of a bullet or the weight of a bridge is a matter of the correct combination of numbers.... to be familiar with linear equations, exponents and radicals, quadratic equations, and the lined area of geometry... to know the difference between indefinite and definite integrals... to study heat, sound, light, and thermodynamics... to strain at the task, to finally understand the mysteries...

BRANDT
A TIME FOR TEAMS
-Running, walking, and crawling 26 miles to Jeff City.

-Playing "touch" football and going home with a torn shirt, a broken finger, and a bloody nose.

-Intramural softball, when the Drafting team wins first place, and then looses to the faculty.

-The first home basketball game in the new gym--and winning.

-Getting new basketball uniforms--that fit.

-The roar of the crowd yelling "Give 'em heck Linn Tech."

-Ending a successful basketball year 11 wins and 7 loses, along with winning 3rd place in the tournament.

-Playing "spades" in the lounge when class is going on.

-Winning the pool tournament, and collecting $7.50.

-Intramural basketball, where you take your life in your hands.

-Bowling on Monday nights and winning a free "cheeseburger."

-The "smack" of the baseball "jumping" off the bat.

-The "thud" of a fastball "wizzling" past a batter.

-An exasperating sigh, when it's the bottom of the 9th, bases loaded, 2 outs, loosing by a run, 3 balls and 2 strikes, and you strike out.

-And last but not least, you don't have to partake in a sport to really and truely be, A SPORT!!

OVERALL RESULTS:

WON----11
LOST----7
Pre-game warmup.

In the regular season Linn posted a fine nine wins and six loses, and overall eleven wins and seven loses. During the regular season Linn scored 1186 points as to 1092 points for the opposition. Scoring the most points for the EAGLES was Craig Fitzgerald with 280, followed closely by Eugene Williams with 260.

From the entire FORUM staff, along with the student body, we wish to congratulate the team members and also Coach Rakes for a fine successful season!

SCORING

1. Craig Fitzgerald----280
2. Eugene Williams-----260

SEASON RECORD:
WON: 5
LOST: 11
Dennis takes his cuts against the Rolla Miners.

Many hours of practice were clocked by the team, and here the camera stops the ball in flight during one such practice.

Taking time between classes to talk baseball are Mike, Coach, and Curt.

Curt tries his luck against a Rolla hurler.
Winning the first place award this year in bowling, are left to right: John Alfermann 146, Allen Kinworthy 152, Ben Filla 139, and Captain Mark Head 163.

Here Wally Payne, left, and Jon Walcott, center, receive first place trophies from Steve, for winning the Spades Tourney.

Jon also received a trophy for high series, 626, for bowling in the College Tournament.
Intramural Activities
WANTED: For service above and beyond the call of duty. Reward: Hours of enjoyment during the week. Left to right: Ken Woods, Mr. Eric Stein-sponsor, and Curt Windham.

Half-time breather. Ken and Curt take it easy during the exciting first place game.

Mr. Stein gets things ready before games.

Play stops as Curt (center court) spots a foul.

Action during the third place game won by DR-2.
Left: Bruce Tebbetts receives the first place award from Mr. Stein. Above, team members—Front: Morris Earp, Paul Johnson, (Back: Jerry Salfen, Bob Backfish, Bruce, and Mike Morton.

Mr. Stein presents Mark Head with the second place award. Players are, from left: Ben Filla, Mark, John Alfermann, and Allen Kinworthy. Not shown: Rusty Schleifer, Mark Towner, Jim Schuelen, and Wayne Hill.

A TIME TO PLAY
WE KEPT THE PHONES BUSY....

OUR INSTRUCTORS BUSY....

THE COOKS BUSY.......

IT WAS A BUSY YEAR.....
A GOOD YEAR............
IN MANY WAYS, THE BEST YEAR
WE'VE EVER HAD AT LINN TECH.
