LOKI (Loh' Kee), in Norse mythology, was the god of mischief. He was born into a family of giants who warred with the gods. He became Odin's (Norse king of gods) foster brother and was accepted among the other gods. Though he was often wicked, he was cunning and frequently helped the other Norse gods with their problems. In his spirit of helpfulness and fun, we name our book "LOKI".

From its beginning in 1961 Linn Technical College has been and will remain committed to the 80% of Missouri youth who do not attend a regular four year college.

Linn Technical College opened its doors in the fall of 1961. At the time the school opened it consisted of 1 teacher and 20 students. Classes were held in the basement of the high school. Electronics was the only course offered by the school at that time. Automotive Technology and Design Drafting programs were added in 1962. On June 7, 1965, the school was officially designated by the State Board of Education as an area vocational school. Machine Tool Technology was added 1967, and the enrollment had reached 300 full time students.

In 1968, the Federal Aviation Administration approved Aviation program was added to the curriculum. Auto Body repair was first offered in 1970. In 1973 Accounting and Air Conditioning were added, and by 1976 approximately 500 students were enrolled at Linn. The programs have been financed through the State Board of Education and by contributions from both private and corporate sources.

Linn Technical College continues a job placement of over 90% for its graduates. A students training is not considered complete until they have found and accepted employment related to their field of study. This has been the policy of the school from its beginning with the first graduating class and continuing through the most recent.

Many companies come to Linn Tech each year with job applications for graduating students. Most students are interviewed personally before graduation.

Linn Technical College now enrolls over 700 students and holds a reputation of training many fine people who go into industry and do commendable jobs.

We have worked hard on the "LOKI" this year and as usual we nearly failed to meet the deadline. With the help of Mr. Livingston, our sponsor, who did a lot of pushing, we have made it and you have your book.
COUNCIL
Right: In your future, I see a beautiful Blonde...
SANTA CLAUS COMES AGAIN
Mr. Perkins, and the Aviation class donated, bought, and repaired toys for the children of needy families. Money was donated by students and the student council to help out the programs expenses of repairing the toys.

Mr. Perkins started this program five years ago, with only one family to take care of. Within five years, the number has grown to sixty-eight children and is still growing.

Thanks to this program and the efforts of Mr. Perkins and the Aviation class many children have had a very enjoyable Christmas.
Each year the yearbook is dedicated to a person of special merit for their effort in making Linn Tech what it is today. This year the book has been dedicated to Mr. Livingston.

Aside from teaching regular academic courses, he also is in charge of both the newspaper and the yearbook. Without his knowledge and time Linn Tech would not have a publications department. Mr. Livingston came to Linn in 1962 and we hope he will be here for many years to come.
This book has been brought to you by the 1978 Linn Tech Publications staff. We hope you enjoy looking through it both now and in the future. The purpose of this book is to provide a permanent record of the people and events we experienced at Linn Tech in 1977-78.

Years from now we can look back to the friends we made and the good times we had while in school. We would like to thank Jim Valleroy, who designed the “LOKI” cover, and give special thanks to those on the yearbook staff for making this book possible.
