The 1987-1988 LOKI

Linn Technical College
Linn, Missouri 65051
Contents
DEDICATION OF 1988 YEARBOOK
Dedication

A real friend to all Linn Tech students retired this year and the 1988 is dedicated to her great service. Edna Starr, who managed the Linn Tech bookstore for 19 years, retired in October. Former students will remember her as that friendly face who helped them find books and supplies. Edna calculates that she probably dealt with between 4,000 and 5,000 students during her tenure.

Now that she’s retired, Edna plans to keep busy with travel, flowers, and her highest priority will be her grandchildren.

Edna Starr a truly dedicated Linn Tech friend.
We at Linn Technical College face 1988 filled with great optimism. We continue our belief that students are the lifeblood of the College. In this respect we are fortunate. Our enrollment is growing. But we are not leaving this to chance. Each year, our recruiting efforts are expanding. Mr. Bill Bunch and his excellent staff are increasing their visits to college nights and their planned visits to high schools in the spring. This fall our staff attended 121 college night programs as opposed to 87 the preceding year. This coming spring, Linn Tech counselors will visit 400 high schools compared to 282 last year. This all adds up to an increased effort to spread the word about the opportunities available at Linn Tech. Through these efforts we are expanding our leadership role in vocational education in Missouri.

Our expansion is clearly evidenced by this year’s enrollment of 91 in aviation, 70 in design drafting, and 120 in auto mechanics. While other departments show satisfactory enrollment, these three departments particularly show the expanding nature of Linn Technical College’s programs.

With the continued growth in the new campus, we anticipate a much more accelerated expansion. Now that two new buildings have been completed, plans now turn to the construction of a new auto mechanics facility. The request for state funding for half the cost to build the 30,000 square foot auto mechanics building has been approved in the current legislative session. I’m confident Linn Tech can come up with its half of the needed funding and we all sincerely appreciate the legislature’s appropriation of its share.

We are already looking beyond this point. Once the auto mechanics building is completed, the next building planned is for machine tool and air conditioning and refrigeration. By 1994, we hope to have the new campus complete. But naturally, all projections and plans always depend on available funding.

I wish all members of the Class of 88 the very best in their life and future successes. Each graduate has proven that they are successful by completing their program of study. I encourage every member of the Class of 88 to continue their successes on into their careers. Make it happen!
Don Gelven — Education

"The members of the staff of the Division of Education can be justifiably proud of their accomplishments during 1987-1988. It has been an exciting and challenging year. Increased enrollment, new buildings, and new equipment provide solid evidence of progress toward a bright future and our goal of excellence in every area."

"1987-88 has been an excellent year at Linn Tech. The students were motivated to do well at all levels in and out of school. The Student Services staff offers congratulations to its class. If in the years to come we can serve you — let us know.

To the class of '89 welcome back and visit your student services."

James Symmonds — Development

"This past year was a period of accelerated growth for the College. The new aviation technology center is functioning. Enrollment continues to surge. Perhaps most importantly, 1988 graduates are doing exceptionally well in the job market. There is also a feeling that the past is simply prologue to a future marked by even greater growth and service to students."

"Less visible, but just as important, is the substantial progress that we have made in developing and implementing an instructional management system. In all of these areas a lot has been accomplished, but a lot remains to be done. It has been hard work, requiring everyone to pitch in and do their part, but it has been enjoyable."

" Vice Presidents

VICE PRESIDENTS  7"
Linn Technical College is justifiably proud of its Advisory Council. The Council is composed of individuals representing a cross-section of business and industry who are dedicated to keeping technical education abreast of industry's requirements. It is imperative that the institution remain responsive to industry's needs. This function is so critical that both Missouri and federal statutes require that each local education agency that receives state or federal funds have an advisory council.
Administration and Office Staff

1988 has seen Linn Tech grow, and with growth comes more work for those involved. But with the work comes fun times and laughter and true teamwork to make Linn Tech what it is.
Support Staff

Missing from our Photos include Matt Voss and Dan Thomson our “ever-ready” campus maintenance crew. Everyone in support services wishes the 1988 class the Best of Luck!

Our Newspaper is published twice a semester. Carrie Painter — Sponsor, Connie Anderson — Editor, Tanya Troesser — Cartoonist, Dena Nichols — puzzles and Illustrations, Shelly Sturgess, Janice Huhn, Fred Wegman, and Ruby Morgan — Reporters.

Creating art work

Devising puzzles

Fred and Connie think hard.

Dena Nichols puzzles and illustrations.
The Peer Tutors program is a major component of the overall resources provided by the Technical Learning Center. Peer Tutors combine the roles of student and teacher, performing both functions at once. They are second-year students selected by their Department Heads for their proven ability in their field of study.
We are Today's Non-Traditional Women and we represent all of the female students on campus. We are a support group, and provide ways to have fun, and help in the community. Also, two of our projects this year were blood drive for the Red Cross and "Cans for Christmas" for the Division of Family Services. Our officers this year are: Marilyn Wright — President, Janet Muenke — Vice President, Kit Hopper — Secretary, Melissa Winde — Treasurer, Stephanie Strope — Student Council Representative.

Is this going to hurt?

Dawn S. OT II — helping with the TNT Dinner

Student Council Picnics

Student Council busy at work

All right!!
This year we have a large and enthusiastic group. We have had a hayride with a weiner roast and a barbeque. We also attended a concert, had a Lock-in, went bowling and canoeing. At the beginning of the school term we had a party to welcome old and new members. Dennis Love — pastor, and Nancy Orrick are our Thursday night bible study leaders.
nt Life
Our yearbook is named after the Norse God of Mischief. Loki is often referred to as a cunning trickster who sometimes helped the Gods, but many times caused them embarrassment and trouble. Our students bear a strong resemblance to Loki occasionally, but work gets accomplished.
Dances

The Student Council sponsored several dances this year. Our first was the Welcome Back Dance; then the Halloween, Christmas, Homecoming, Valentine, April Fool's, and Graduation Dances. There was a problem towards the middle of the year that necessitated laying down a few rules, but everything went smoothly from then on.
Computer Office Training
(Jefferson City)

Linn Tech also offers a series of daytime and evening computer office training at facilities located at 515 East High St. in Jefferson City, MO. These courses are intended for persons who are not seeking a degree, but are interested in improving their office skills while earning college credit.

Instruction is individualized and self-paced.

Just part of the 87-88 class!!!

**Coach:** Jim Thoenen

**Assistant:** John Scheulen
In 1961, with the support of the School Board of Linn County...

...what began in 1961 as a one-room, one-instructor, and operation has grown to campus facilities valued in the millions, a staff of over 100, and a student body close to 600.
In 1961 when Linn Technical College was founded, long before it was anything but an idea for educational potential, those who played an active part in its background in its beginning had the needed quantity in common: VISION. They saw beyond the inadequate facilities; they dreamed of what the school would become. They were willing to invest all they had in time, effort, and money in a school they realized was a sure bet. They, too, strained at the task. They dug deep into their treasures of money and talent. They faced administrators at all government levels, they enlisted the help of townspeople. They took to the task with vigor for what they saw in their initial vision. AND THEY WON!

WORK WORK WORK. Has always been important at Linn Tech. Both the Work Ethic and Performance are vital for success!!!

Friendships that last a LIFE TIME start at good ole Linn Tech.
The Linn Tech. Cheerleaders at the end of the basketball season were Carrie Siegler, Captain; Dawn Shannon, Co-Captain; Debbie Strope, Mary Jaegers, and Stephanie Strope. Their supervisor was Roberta Blankenship from Careers Unlimited.

The Cheerleaders worked hard all year by attending all basketball games, organizing spirit week, helping with homecoming activities, and trying to raise school spirit.

The Student Council helps out with the costs of their new skirts, sweaters, jackets, and shoes. The cheerleaders also raised money by having a bake sale in November and by selling Linn Tech. sweats.

Graduation 1988 was the largest yet for Linn Tech. Close to 300 students walked across the stage and received the honors from board president Ronald Baker. Commencement exercises were held on May 13 at 8 pm. The Honorable Jeff W. Schaeperkoetter — State Representative for the 110th District of the State of Mo. was the keynote speaker.
3.7 and above — whew!

Is it hot or what?

One last laugh.
Jeff Johnson listens on.

Mitch Buckner good-bye hug.

Are we having fun yet?

Dawn and her special cargo.

ALL OF THAT WORK FOR THIS ONE PIECE OF PAPER?
Again this fall we had a yearbook cover design contest. Scott Denevans, Auto Body II design received the most votes. He won fifteen dollars which he donated for another color page in the yearbook.

Scott is from St. Louis and is a second year Auto Body student. While at Linn Tech, Scott was involved in the student council, yearbook staff, work study program and a peer tutor program.

CONGRATULATIONS Scott!
Another issue of the LOKI is finally completed. I'd like to thank the staff and everyone else that helped, and a special thanks to Mrs. Scherf for being patient when we missed our first deadline. I hope everyone appreciates the effort that has been given by the staff. I am proud to have been a part of Linn Tech. Thanks.
